

# AQ26 WeeklyV2 Evidence Report

## Controlled-use boundary

Controlled-review evidence harvester. No WHO/UNEP/EEA/C40 or expert endorsement claimed.  
No causal attribution unless gates pass.

## Executive status

- Source records: `72`
- OK: `68`
- Errors: `0`
- Warnings: `4`
- Skipped: `0`
- Redaction leaks: `0`
- Google Drive files inventoried: `5000`
- Drive inventory truncated: `True`
- Satellite catalogue products: `350`
- High-priority official filings: `100`
- Medium-priority official filings: `99`

## OpenAQ low-rate safety

- OpenAQ enabled: `True`
- OpenAQ request count: `5`
- OpenAQ max requests/run: `8`
- OpenAQ stopped reason: `completed\_low\_rate\_plan`
- OpenAQ rate limit seen: `False`
- OpenAQ auth error seen: `False`

## CAMS readiness

- CAMS key present: `True`
- CAMS endpoint configured: `False`
- CAMS data ready: `False`

## CDSE readiness

- CDSE catalogue ready: `True`

- CDSE OData username/password ready: `True`
- CDSE Sentinel Hub client credentials ready: `True`
- CDSE download ready: `True`
- CDSE auth recommendation: `Both CDSE auth routes are ready.`

## **News provider warnings**

- News warning count: `4`

## **Evidence gates**

- Redaction ready: `True`
- Met Office ready: `True`
- Ground AQ ready: `True`
- OpenAQ ready: `True`
- OpenAQ safety ready: `True`
- CAMS key present: `True`
- CAMS endpoint configured: `False`
- CAMS data ready: `False`
- Satellite catalogue ready: `True`
- Satellite extraction ready: `False`
- Official filings ready: `True`
- Drive ready: `True`
- External submission ready: `False`

## **Methods alignment**

- Dominici: causal language remains guarded; exposure/confounder readiness is tracked.
- Martin: satellite catalogue supports remote sensing context; extraction/fusion remains next stage.
- Brauer: multi-source exposure screening is structured; health burden attribution is not claimed.
- Anenberg: trace-gas/emissions-relevant product families are prioritised.
- Damoulas: target/control sites, gaps and metadata inventory prepare digital-twin style modelling.
